HYDROBIOLOGIA
*Volume 435, 15 September 2000*

*Obituary: W.T. (Tommy) Edmondson*
**"Good science and good luck"**
John T. Lehman 1–3

*Opinion*
**Monitoring river health**
Richard H. Norris, Charles P. Hawkins 5–17

**Vertical distribution of planktonic ciliates in strongly stratified temperate lakes**
Priit Zingel, Ingmar Ott 19–26

**A study of rotifer feeding and digestive processes using erythrocytes as microparticulate markers**
N. Lindemann, W. Kleinow 27–41

**Several new and known species from the families Coninckiidae and Comesomatidae (Nematoda) in the White Sea**
Alexei V. Tchesunov 43–59

***Karualona* n.gen. (Anomopoda: Chydoridae), with a description of two new species, and a key to all known species**
Henri J. Dumont, Marcelo Silva-Briano 61–82

**A eukaryotic alga from picoplankton of Lake Baikal: morphology, ultrastructure and rDNA sequence data**
Olga I. Belykh, Ekaterina A. Semenova, Konstantin D. Kuznedelov, Elena I. Zaika, Nina E. Guselnikova 83–90

**Competition between the green alga *Scenedesmus* and the cyanobacterium *Synechococcus* under different modes of inorganic nitrogen supply**
P. Hyenstrand, U. Burkert, A. Pettersson, P. Blomqvist 91–98

**Characteristics of cladoceran and copepod communities in floodplain habitats of the Atchafalaya River Basin**
Norman L. Davidson, Jr., William E. Kelso, D. Allen Rutherford 99–107

**Direct and indirect interactions for coexistence in a species-defined microcosm**
Kazuaki Matsui, Shigeki Kono, Asuka Saeki, Nobuyoshi Ishii, Man-Gi Min, Zen' ichiro Kawabata 109–116

**Lifetable demography of four cladoceran species in relation to algal food (*Chlorella vulgaris*) density**
S. Nandini, S.S.S. Sarma 117–126

**Effects of macro-detritivores density on leaf detritus processing rate: a macrocosm experiment**
Stefano Fazi, Loreto Rossi 127–134

**Applying heat and mass balance theory to determine the flow rate for the measurement of benthic material flux in a flow-through system**
Tamiji Yamamoto, Hiroyuki Ikeda, Tamotsu Hara, Hidetaka Takeoka 135–142

**Seasonality and distribution of epilithic diatoms, macroalgae and macrophytes in a spring-fed stream system in Ontario, Canada**
Alison R. Sherwood, Tara L. Rintoul, Kirsten M. Müller, Robert G. Sheath 143–152

**Moitessier's pea clam *Pisidium moitessierianum* (Bivalvia, Sphaeriidae): a cryptogenic mollusc in the Great Lakes**
Igor A. Grigorovich, Alexei V. Korniushin, Hugh J. MacIsaac 153–165

**Benthic macroinvertebrate communities of intermittent streams in the middle reaches of the Guadiana Basin (Portugal)**
A.M. Pires, I.G. Cowx, M.M. Coelho 167–175

**Phytoplankton assemblage structure and dynamics as indicator of the recent trophic and biological evolution of the western basin of Lake Como (N. Italy)**
R. Bettinetti, G. Morabito, A. Provini 177–190

**Genetic variation in a subtropical population of *Daphnia***
Thomas Platt, Ken Spitze 191–196

**Using size distributions to detect nutrient and sediment effects within and between habitats**
Robert M. Baca, Stephen T. Threlkeld 197–211

**Using macroinvertebrate species assemblages to identify river channel habitat units: an application of the functional habitats concept to a large, unpolluted Italian river (River Ticino, northern Italy)**
Andrea Buffagni, Giuseppe A. Crosa, David M. Harper, Joanna L. Kemp 213–225

**Book reviews** 227–236

**Author index** 237
